

L.O. Can I complete multiplication questions accurately using repeated addition and grouping?

For each question, first draw diagrams. Then write out the maths calculation including the answer.

1. Sam has 3 1p pieces in his pocket. How much money does Sam have altogether?
2. 5 bunches of flowers. 3 flowers in each bunch. How many flowers altogether?
3. 2 pots of marbles. There are 7 marbles in each jar. How many marbles are there altogether?
4. 10 pens in a packet. Susie has 6 packets. How many pens are there altogether?
5. 15 pairs of socks. How many individual socks are there altogether?
6. 4 pairs of gloves. How many finger and thumbs are there altogether?
7. 12 packets of pencils. There are 5 pencils in each packet. How many blocks of paint are there altogether?
8. Mo has 4 bags of marbles with 5 marbles in each bag. Susie has 3 bags of marbles with 10 marbles in each bag. Who has the most marbles?
9. Bananas are 10p each. Priya wants to buy 7 bananas. She has 12 5p pieces. Does she have enough money? Explain your answer.
