

Bunny Hops

I can use a number line to solve division problems.

Draw number lines to find the answers to these division problems.

1. $45 \div 3 =$

Answer:

2. $112 \div 8 =$

Answer:

3. $64 \div 4 =$

Answer:

4. $85 \div 5 =$

Answer:

5. $120 \div 8 =$

Answer:

Bunny Hops

When the numbers get bigger, it takes too long to hop one group at a time so we can hop in groups of 10, 5 or 2.

Draw number lines to find the answers to these division problems.

6. $80 \div 5 =$

Answer:

7. $72 \div 4 =$

Answer:

8. $51 \div 3 =$

Answer:

9. $144 \div 8 =$

Answer:

10. $75 \div 3 =$

Answer:

Bunny Hops

Grab Some Carrots

Grab a handful of carrots (counters or cubes). Count your carrots. Can you divide them into groups of 3, 4 and 8? Are there any carrots left over? We call this a remainder.

For example:

$$11 \div 4 = 2 \text{ remainder } 3$$

11 carrots shared into groups of 4 makes 2 groups with 3 carrots left over.
