

1

Order It - Mass

Collect five objects from around your house or classroom.
Order them from heaviest to lightest.

Show your items and explain how you worked out the order.
What strategies did you use to compare the items?

Then

2

Estimate the Mass

Collect some food items from your kitchen.
Estimate their mass in grams and order them from heaviest to lightest.

How close were your estimates to the real mass in grams?

Gold

Choose some food items from your kitchen which have the weight recorded on the outside. Choose three at a time to add together using our written method for addition. Do this 10 times.

1) Use the information shown to work out the mass of each item.

1 plum	
1 banana	
1 strawberry	

2) How many different fruit smoothie recipes can you make with a mass of 300g using the fruit?
