

Name: _____ Date: _____

First, label the diagram to show how a greenhouse becomes and stays warm.
Next, answer the questions about greenhouses and how they work.

What two requirements for a plant's survival can a greenhouse provide?

What part of a greenhouse allows the sunlight to enter?

What does the sunlight do to the air and plants in the greenhouse?

How can the plants in a greenhouse be stopped from overheating?

Write about some of the different types of greenhouse you know about.
