

## Adding and subtracting multiples of 10

Copy and complete these additions and subtractions.

**GRAB!** Multiples of 10, bonds to 60, 70, 80, 90 and 100 poster

1  $645 + 30 = \square$

7  $295 - 50 = \square$

2  $433 + 60 = \square$

8  $883 - 70 = \square$

3  $217 + 80 = \square$

9  $261 - 60 = \square$

4  $853 + 40 = \square$

10  $794 - 30 = \square$

5  $782 + 50 = \square$

11  $225 - 30 = \square$

6  $674 + 70 = \square$

12  $342 - 80 = \square$

**THINK**

$\square 45 + \square 0 = \square$

Can you solve this problem, then write and complete four others where the coloured digits are the same as each other?

I am confident with adding and subtracting multiples of 10 to and from 3-digit numbers.
