

**Your task today is to create a map for your expedition.**

Make sure you include:

- A drawing (map) of land and sea (space and planets, for those in space).
- Your start point and finish point.
- Your route; countries/planets/places you will fly over, sail past etc.
- Label your map with names of seas and countries (planets).
- A key which shows the meanings of any symbols on your map.
- A 'close up box' showing detail of where you are going in the place you are exploring.
