## DESIGN CRITERIA:

- Your mini greenhouse must be at least 20cm long, 10cm wide and 15cm high.
- It must have a resealable opening somewhere so that the plants can be watered and the greenhouse ventilated when necessary.

Materials:

Tools:

Draw a detailed diagram of your mini greenhouse in this box. Label the materials you will be using for each section, and explain how you will join them.

How will you make a resealable opening?

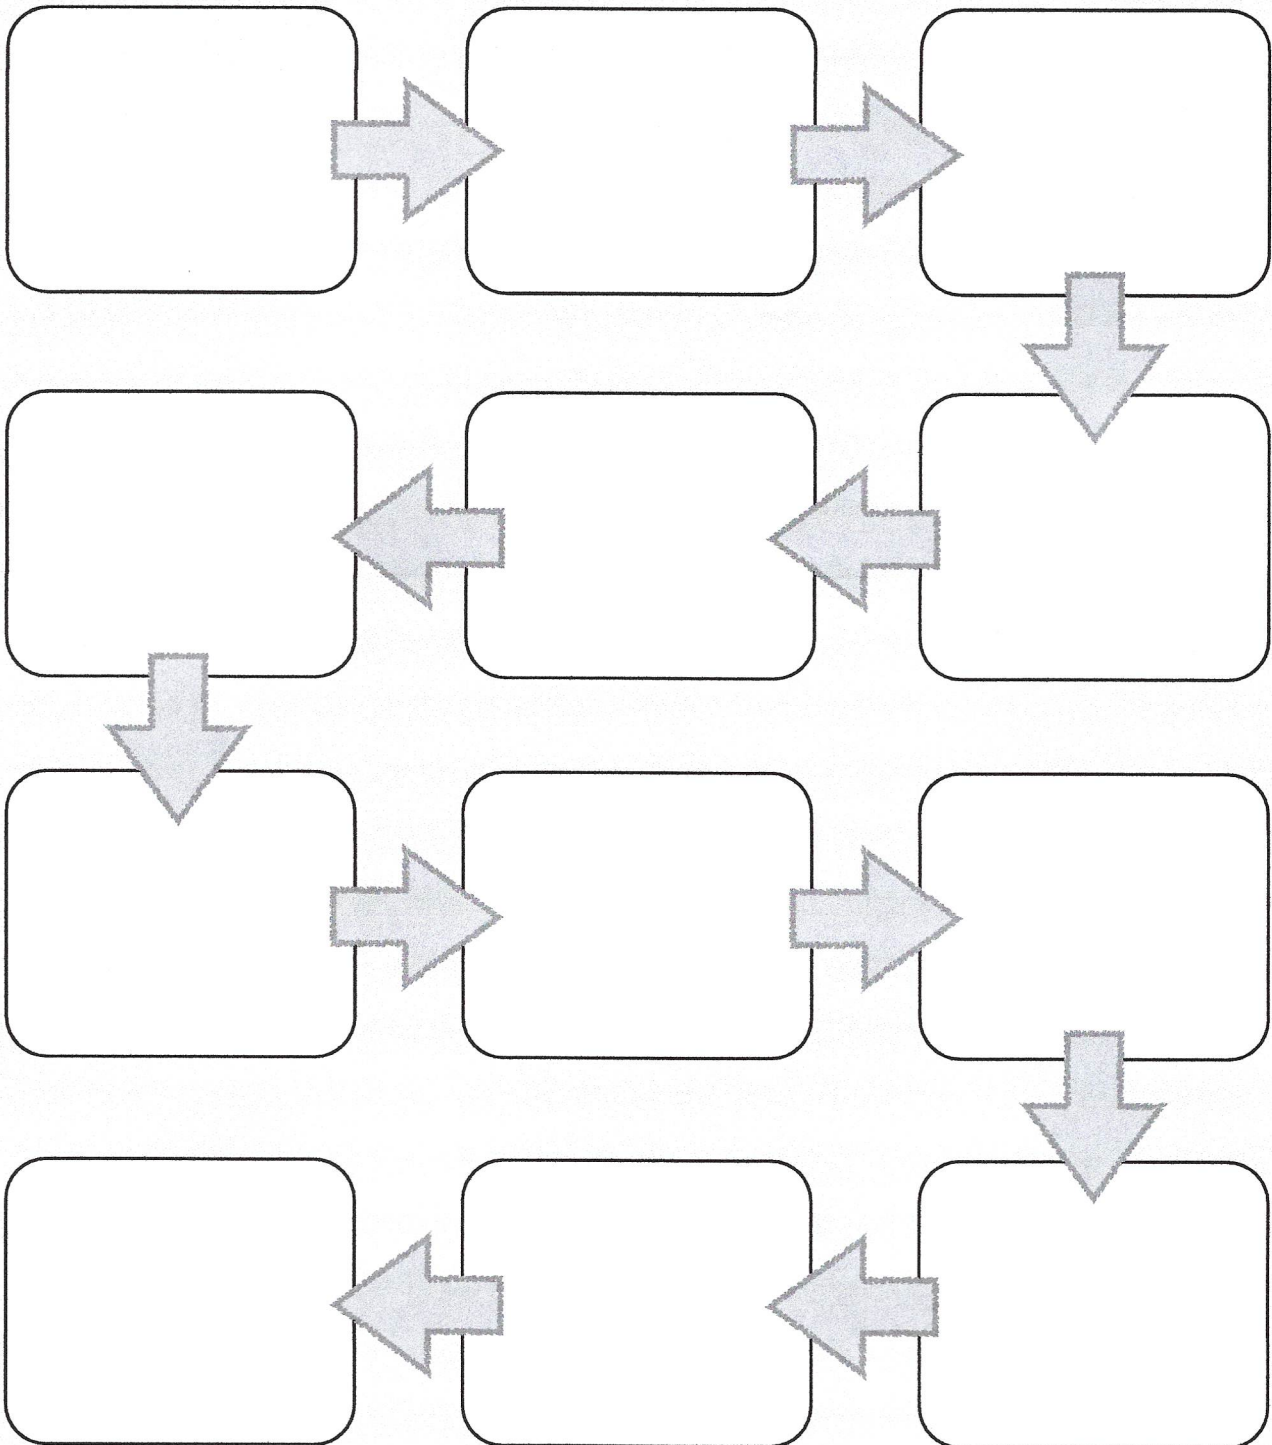

(Label the location of this on your diagram too.)

How does your design meet the design criteria?

Use this flow chart to plan your **order of work**. Think carefully about each step – what you will need, and how you will achieve it.

Now, talk through your order of work with a partner. Does it make sense to them?  
Would they be able to follow it?
